

AGILE BASED
COMPETENCY
MANAGEMENT

Get out of the box! Think different - Manage different!

Co-funded by the
Erasmus+ Programme
of the European Union

<http://agilecompetency.com>

The primary objective of the project is to create, describe and evaluate a Method of Competency Assessment in Work Contexts and to provide tools for its practical use in enterprises

The project pursues the following specific objectives:

- + support of enterprises and individuals by providing a complete tool of competency assessment compatible with the EQF;
- + exchange of good practices between partners working in the project as well as other local partners;
- + creation of a flexible tool (application), enabling the development of qualifications in the work context and creating flexible development pathways;
- + implementing a variety of formats, environments and diverse content.

Often there is a gap between competencies' definitions and "real work", contexts in which people act and are seen.

Therefore the core point of the ABC Management project is to create a set of ready-to-use tools enabling contextual competency assessment having solid scientific background in the method of competency assessment in work contexts.

Results of ABC Management:

- Research and method of competency assessment in work contexts;
- 1000 cases representing a combination of chosen competencies and particular work contexts;
- Knowledge pills (short learning content sequences);
- Implementation guide.

Target Groups:

- Those wishing to conduct a competency assessment

Erasmus+ / Strategic Partnership

Project Duration: 09/2014 – 08/2017 (36 months)

Grant Agreement Number: 2014-1-PL01-KA202-003592

The Multidisciplinary European Research Institute Graz, founded in 2003, aims to link researchers and institutions from diverse areas in order to pursue and support common research, development, intermediation and education activities.

The core fields of expertise deal with social, cultural, political, ecological and economic issues in addition to more general topics connected to internal and external relations within the European Union. A main field of interest are education and training systems in Europe, in particular vocational education and training.

The Multidisciplinary European Research Institute Graz has extensive experience in evaluating project proposals and reports in a multitude of different funding programmes by acting as evaluators for regional and national agencies (i.e. Erasmus+ Austrian National Agency) and on European level for the EACEA and other European Commission agencies. Furthermore MERIG supports the implementation of ongoing projects as external evaluators.

Our Role

In the ABC Management project MERIG is responsible for internal quality assurance, the conduction of the survey in Austria, the elaboration of the content as well as the dissemination of results.
